

Report Assignment-3

Adaboost:

Only parameters were number of trees & threshold variance in pca, and best validation score in sufficient time came on 36 trees and threshold= 0.8

Validation Score for 36 trees: 0.8752125255048 Accuracy for 36 trees: 0.914375

Misclassified instances= 411/4800

Last image wrongly classified as positive and rest wrongly as negative

Random Forest:

Best parameters:

```
'num_trees' : 20,  
  'threshold variance': 0.35  
"bootstrap_fraction" : 0.3,  
"min_samples_split" : 7,  
"max_depth" : 20,  
"min_gain" : 0.2,  
"criterion" : "gini",  
"class_weight" : 1.0,
```

```
"k_features" : None,  
"weighted_forest" : True,  
"val_score" : 0.85,  
"accuracy" : 0.89  
Misclassified: 528
```

All these images were wrongly classified as 0

SVM:

Hard margin linear:

No pca was used and C is fixed, no other parameter

0.87

all wrongly classified as positive

Soft margin linear: Pca not used

```
"C" : 1e-2,
"kernel" : 'linear',
"zero_threshold" : 1e-5,
"val_score" : 0.93,
```

positive

all wrongly classified as

Soft margin rbf: Pca

```
"C" : 1e-2,
"kernel" : 'rbf',
"gamma" : 1e-2,
"zero_threshold" : 1e-5,
"val_score" : 0.84
```

positive

wrongly classified as

Hard margin rbf:

Unable to finish on time
